## Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://evilzipik.ru/wp-content/themes/ezru/images/comments.gif> (expiration not specified)

[Minify CSS](#) for the following resources to reduce their size by 589B (18% reduction).

- Minifying <http://evilzipik.ru/wp-content/themes/ezru/style.css> could save 589B (18% reduction) after compression.

[Optimize CSS Delivery](#) of the following:

- <http://evilzipik.ru/wp-content/themes/ezru/style.css>

## 65 / 100 User Experience

### Should Fix:

#### Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

#### Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

#### Size tap targets appropriately
